How to Update Your Phone Number in the Employee Directory

Monday, July 3, 2017

It's time to verify and update your contact information in the Employee Directory. If you have ever had the experience of looking up a colleague in the directory only to find missing information, then you understand the importance of keeping the directory up-to-date.

If you are new to the District, you will want to ensure your contact information is listed in the directory. If you are a veteran, you will want to verify your directory information is current.

First, check how you are listed in the [Employee Directory](#) by searching for your name. If your phone number or room number is incorrect or unlisted, follow these steps to ensure your colleagues have the most up-to-date information.
